VISUALACOUSTIQ Install + Care

VISUALACOUSTIQ puts the power of visual impact in your hands while still providing acoustic benefits wherever it is installed. The kit is comprised of 3 separate parts that will require assembly:

- **Wall-mount fabric frame** pg. 1
- **Acoustic panel installation** pg. 2
- **Graphic material application** pg. 3

Wall-mount Fabric Frame Assembly and Installation Guide

Pieces Included

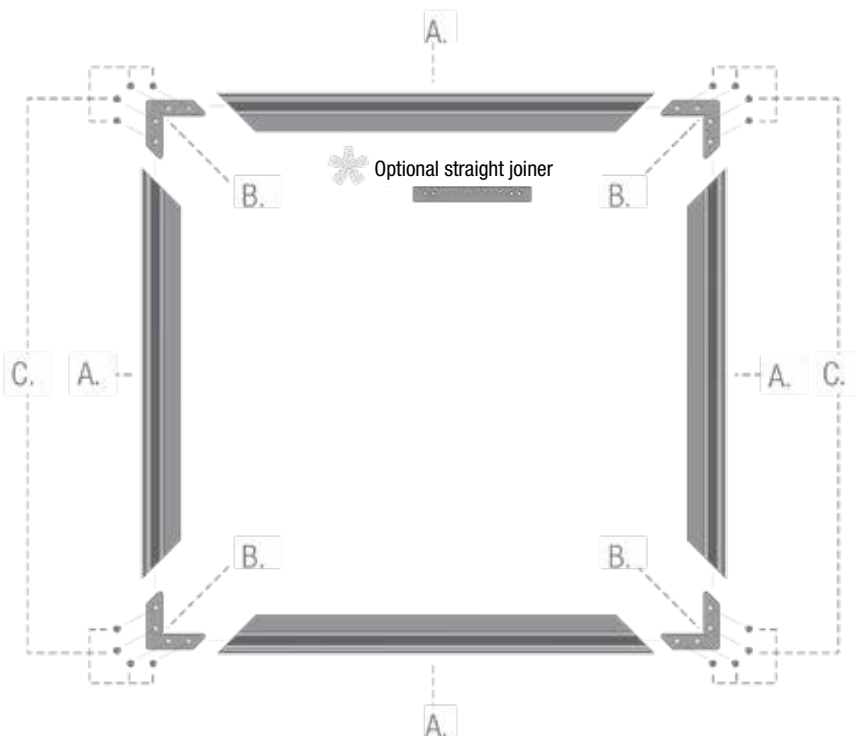

- A. Aluminum Framing
- B. Steel Corner Joiner
(Larger frames may have optional straight joiners included)

FINAL ASSEMBLY

Acoustic Panel Assembly

Multi-panel Installation Guide

Because **VISUAL**ACOUSTIQ is a custom order, the acoustic panels must be laid out and fit within the frame. When assembled properly, the panels will precisely fit inside the frame and be ready for installation of the graphic material. (page 3) Your kit may contain a single, or multiple panels. Glue or screw* the panels to the wall. (see typical examples below)

Graphic Panel

Application Guide

VISUALACOUSTIQ puts the power of change in your hands. When its time to change... take out the old and put in the new.

When installing or changing graphic material:

- **FIRST** Secure all four corners by inserting ends of edge cleats into corner frame grooves. (fig 1,2 & 3)
- **SECOND** Gently push cleats from center into retaining groove by running your thumb, to the edge of each corner. (fig 4)
- Be sure to leave the hang tag exposed for easy removal or replacement. If this is a permanent installation you can remove or tuck tag in. (fig 5)
