## Unika Vaev Introduces New Exciting Products from Abstracta

**North Franklin CT, March 2021** - Unika Vaev, provider of fresh solutions for contract textile and acoustical needs, is pleased to announce the addition of new acoustic products from Abstracta.

**Air-X** - Makes it easy to create a harmonious soundscape.

Unika Vaev extends their Air Collection with Air-X. Stefan Borselius designed the first Air product, Airflake in 2006. The Air Series have been a very successful collection for the last 15 years – it makes your space pleasing for both your ears and eyes.

Borselius is taking inspiration from geometry and nature for his Air designs – like the shape of flowers, snowflakes, leaves and abstract figures. The Air-X design enters a world of symbols, typography and letters that allow you to create an infinite number of configurations. The Air-X modules are constructed of molded felt covered in fabric, providing excellent noise absorption and echo cancellation.

**Scala XL** - Big soundscapes require big ideas.

Unika Vaev introduces a larger version of Scala - Scala XL. The designer Anya Sebton introduced the original Scala in 2017 after visiting Iceland. Sebton was inspired by the corrugated metal siding and roof on the Icelandic houses.

Scala XL is developed to improve the soundscape in large and noisy spaces. Scala XL's interplay of shape and material has a powerful sound absorbing effect. The increased size amplifies its acoustic capacity and has a bold, sculptural appearance. The new Scala design is inspired by arched roofs and columns. Scala XL is available in a concave or a convex version.

...

Unika Vaev was founded in 1975 and currently provides a wide range of solutions for Contract Textile applications. Unika Vaev's extensive Acoustic Product Collection provides multiple functional and aesthetically pleasing sound absorption and diffusion solutions for ceiling, wall, floor, stationary and movable screens.
